DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

 I. Claims 1-10 and 19-26, drawn to a semiconductor device, classified in class 257, subclass 660.

 II. Claims 11-18, drawn to the method of forming a semiconductor device, classified in class 438, subclass 2.

2. Inventions I and II are related as product made and process of making. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP 806.05(f)). In the instant case, instead of the method used in claims 18 thru 18, the product of invention I can be formed by directly connecting the integrated circuit device to the x-ray shielding layer.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
